Skills

- Typescript | Javascript | Python | NodeJS | GraphQL | gRPC | C# | PHP | Java | Git | E2E Testing | Unit Testing | A/B Testing
- NextJS | ReactJS | VueJS | React Native | Apollo | Express | Yup | Django | Slim | Laravel | ASP.NET Core | Entity Framework | Unity | Scrum
- Frontend | Backend | Full-Stack | Spanish, English

Experience

Software Engineer — Asesorías Informáticas JG — 12/2022 - Present

- Developed custom software solutions tailored to client necessities
- Led a small team, efficiently managing projects and ensuring timely delivery of client-specific software.
- Hired and mentored new developers, providing them opportunities to enter the software development industry and teaching them technical skills and business operations.
- Utilized a variety of programming languages and technologies to create software that not only met but exceeded client expectations, fostering client satisfaction and repeat business.
- Played a crucial role in all phases of the software development process, from initial client consultation to final delivery and support, ensuring high-quality outcomes.

Senior Frontend Engineer | Tech Lead — Buydepa — 05/2023 - 11/2023

- Spearheaded the development process at Buydepa using Next.js and TypeScript, ensuring the implementation of strongly-typed code for high-quality, efficient web applications.
- Utilized expertise in GraphQL for optimizing data handling and interface management, significantly enhancing application performance.
- Advocated for best practices in coding, fostering a culture of excellence and reliability in the team.
- Played a pivotal role in project development, including technical architecture and hands-on coding, thereby elevating the quality and efficiency of frontend systems.
- Led the team in creating performance-oriented web solutions with a focus on robust and maintainable applications.

Software Engineer II — Uber — 08/2022 - 05/2023

- Played an integral role in the security team at Uber, focusing on the Security Console project, responsible for managing employee permissions, groups, and security policies.
- Involved in maintaining and enhancing internal dashboards and plugins, facilitating web authentication and authorization processes.
- Utilized a technology stack comprising JavaScript, Flow, TypeScript, RPC, and Express to contribute to the project's success.
- Ensured robust and secure system architecture, significantly contributing to the security and efficiency of the Security Console project.

Javascript Engineer — Cornershop by Uber — 08/2021 - 01/2023

- Served as a Security JavaScript Engineer at Cornershop, creating and maintaining sophisticated internal platforms for security purposes.
- Handled permissions, authentication, authorization, and VPN configurations as part of key security responsibilities.
- Ensured a high standard of frontend security, including managing web vulnerabilities and overseeing package version control.
- Contributed expertise to reinforce the security infrastructure, safeguarding the integrity of systems and data at Cornershop.

Backend Engineer — Cornershop by Uber — 01/2021 - 08/2021

- Honed skills in the Python Django stack as a Backend Engineer within the security team at Cornershop.
- Focused on developing and enhancing platforms for managing internal permissions, groups, and access to third-party platforms.
- Gained valuable experience in backend development, particularly in the context of security.
- Played a crucial part in maintaining and improving the company's internal security infrastructure.

Software Engineer — Dorange — 09/2018 - 01/2021

- Specialized in using a VueJS/React/Javascript stack for frontend development and a C# ASP.Net Core stack for backend solutions as a Software Developer at Dorange.
- Extended responsibilities include leading a small team, guiding them through various project phases.
- Focused primarily on creating bespoke software for clients in the health sector, tailoring approaches to meet unique project needs.
- Played a pivotal role with leadership and technical expertise in successfully delivering client-specific solutions at Dorange.

Experience

| Mobile Game Developer | Internship | **Baqo** | 09/2019 - 12/2019 |

- Worked as a Mobile Game Developer during my internship at Baqo, as part of my programmer degree program.
- Maintained a complex backend built with PHP and managed MySQL databases.
- Created engaging mobile games using C# with Unity as the game engine.
- Contributed to a notable project, a game celebrating the 500th anniversary of the discovery of the Strait of Magellan.
- Gained valuable insights into game development and backend management, applying and enhancing technical skills.

| Web developer | **UNO10** | 07/2017 - 02/2018 |

- Specialized in creating innovative and fresh websites tailored to diverse client needs as a Web Developer at UNO10.
- Leveraged contemporary web technologies to develop engaging, user-friendly, and visually appealing online presences.
- Worked across multiple sectors, catering to the specific online needs of businesses in various industries.
- Exercised creativity and technical expertise to ensure each project was uniquely crafted, aligning with clients' specific goals and brand identities.

Education

| Computer Engineering (Incomplete) | **INACAP** | *Punta Arenas, Chile* | **2019 - 2020** |
| Programmer Analyst | **INACAP** | *Punta Arenas, Chile* | **2017 - 2019** |

Licenses & Certifications

80 hours of English lessons	**Preply**	*Credential*	**02/2023**
EFSET English Certificate (C1)	**EF English Test**	*Credential*	**02/2023**
Version Control	**Meta**	*Credential*	**12/2022**
Front-end development	**Meta**	*Credential*	**09/2022**
Programming with Javascript	**Meta**	*Credential*	**09/2022**
React Native without frontiers	**Udemy**	*Credential*	**07/2022**
OWASP Web Security	**Platzi**	*Credential*	**03/2022**
Build Modern Systems with ASP Net Core	**Udemy**	*Credential*	**06/2019**

Honors & awards

- **Geniuses don't sleep:** First place in JAVA and SQL programming competition
- **Geniuses don't sleep:** First place in JAVA programming competition

Mentorships

- **Programming 101:** I taught an introductory programming class to students interested in pursuing a degree in Computer Engineering
- **Private Mentor:** Private programming classes where I teach from the logical base to the specialized use of modern frameworks, currently I have taught classes for technologies: PHP, Python, Javascript
